EXAMINER'S AMENDMENT

The Office Action of April 10, 2009 indicated that claims 1-19 are Group I, claim 20 is Group II, and claims 21-25 are Group III. The correct grouping is claim 1-18 for Group I, claim 19 for Group II and claims 20-24 for Group III.

Applicant elected Group I with traverse, and argues that there is no serious burden; however, the Groups II and III are separate inventions from Group I, which requires different search strategy and different search areas. The restriction requirement is final.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christopher D. Ward on June 19, 2009.

The application has been amended as follows:

Claims 19-24 are cancelled.

Claim 18 is amended as follows.

18. (Currently Amended) ~~The immersion exposure method according to claim 17,~~ An immersion exposure method comprising applying an exposure beam to a mask and exposing a substrate using the exposure beam through a liquid provided between a lens of a projection optical system and the substrate, the liquid being the immersion exposure liquid according to claim 1, wherein an immersion upper layer film is formed on a surface of a resist film on the

Art Unit: 2851

substrate, the immersion upper layer film containing a resin component which is soluble in an alkaline developer and insoluble in the immersion exposure liquid ~~according to claim 1~~ and containing at least one of a hexafluorocarbon group and a carboxyl group as a substituent for providing the alkali solubility.

The following is an examiner's statement of reasons for allowance: None of the prior art of record including those cited in the PCT application teaches or discloses an immersion exposure liquid used for an immersion exposure device or an immersion exposure method in which a substrate is exposed through a liquid provided between a lens of a projection optical system and the substrate, the immersion exposure liquid being in an operating temperature range of the immersion exposure device and comprising an alicyclic hydrocarbon compound or cyclic hydrocarbon compound containing a silicon atom in its ring structure, wherein the compound has a transmittance of radiation with a wavelength of 193 nm of 70% or more at an optical path length of 1 mm and has a refractive index for D lines of 1.4 or more.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter B. Kim whose telephone number is (571) 272-2120. The examiner can normally be reached on 9:00 AM - 5:30 PM.

Art Unit: 2851

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diane Lee can be reached on (571) 272-2399. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
